Experience

Garner Distributed Workflow

November 2018 – Present

Software engineer

- Practiced **GitOps** for continuous deployment using **ArgoCD**
- Introduced **functional programming**, planned weekly study sessions to onboard team members
- Migrated production environment from systemd services on manually managed VMs to **Kubernetes**
- Developed infrastructure as code project from scratch using **Terraform**
- Optimized DB result parsing to be 2000x faster by reducing the runtime complexity from $\mathcal{O}(n^3)$ to $\mathcal{O}(n \log n)$

Skills

Proficient: Scala, Python, Docker, Terraform, Google Cloud Platform, Linux, Kubernetes, TypeScript, Angular, Java, Jenkins

Familiar: Haskell, Rust, Vue.js, C#, AWS, C

Projects

Office hour scheduler

Open Source project

<https://github.com/office-hour-scheduler/ohs>

- Collaborated with several other developers to build a webapp for scheduling office hours with professors
- Designed the backend using **domain-driven** design principles
- Implemented the backend API using **GraphQL**
- Built the artifact as a Docker image in CI

Chat bot

Open Source project

<https://github.com/MaT1g3R/YasenBaka>

- Created a chat bot serving 1000+ chat rooms at its peak
- Explored asynchronous programming using the **asyncio** library
- Deployed the application using Docker to **AWS**

Education

University of Toronto

September 2016 – April 2021

Bachelor of Science, **Computer Science Specialist**
